

**Radiology
Utilization Management,
Claims Studio & Delegated Health Plans
Procedure Code(s)
Additions, Deletions, & Description Changes
2022**

eviCore healthcare is recommending several updates to the managed code lists as a result of mid-year and 2022 American Medical Association (AMA) CPT® code additions, deletions and definition changes. The details of the updates are discussed in more detail below.

Should you participate in the applicable components of the listed eviCore programs, the outlined changes will be implemented effective January 1, 2022.

For codes revisions that are in scope, we recommend the following changes:

- **Code Additions:** AMA posted additions Mid-Year 2021 and for 01/01/2022, these additions will be effective 01/01/2022 with eviCore.
- **Code Deletions:** AMA termed these codes effective 12/31/2021. eviCore will no longer process requests for these procedure for dates of service after 12/31/2021.
- **Code Description Revisions:** AMA revised descriptions for 01/01/2022 with no result in material changes, notification is for information purposes only.

Radiology and Cardiology

CMS added the following procedure codes and were released Mid-Year and will be effective with eviCore Claims Studio, and Delegated Claims 01/01/2022:

Solution	Code	Description
Radiology	A9592	Copper Cu-64, dotatate, diagnostic, 1 millicurie
Radiology	A9593	Gallium ga-68 psma-11, diagnostic, (ucsf), 1 millicurie
Radiology	A9594	Gallium ga-68 psma-11, diagnostic, (ucla), 1 millicurie
Radiology	A9597	Positron emission tomography radiopharmaceutical, diagnostic, for tumor identification, not otherwise classified (Pylarify at this time)
Radiology	C9067	Gallium ga-68, dotatoc, diagnostic, 0.01 mci

The AMA added the following procedure codes 01/01/2022 and will be effective with eviCore Utilization Management, Claims Studio, and Delegated Claims 01/01/2022:

Solution	Code	Description
Radiology	0697T	Quantitative magnetic resonance for analysis of tissue composition (eg, fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation and report, obtained without diagnostic MRI examination of the same anatomy (eg, organ, gland, tissue, target structure) during the same session; multiple organs
Radiology	+0698T	Quantitative magnetic resonance for analysis of tissue composition (eg, fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation and report, obtained with diagnostic MRI examination of the same anatomy (eg, organ, gland, tissue, target structure); multiple organs (List separately in addition to code for primary procedure)
Radiology	0710T*	Noninvasive arterial plaque analysis using software processing of data from non-coronary computerized tomography angiography; including data preparation and transmission, quantification of the structure and composition of the vessel wall and assessment for lipid-rich necrotic core plaque to assess atherosclerotic plaque stability, data review, interpretation and report
Radiology	0711T*	Noninvasive arterial plaque analysis using software processing of data from non-coronary computerized tomography angiography; data preparation and transmission
Radiology	0712T*	Noninvasive arterial plaque analysis using software processing of data from non-coronary computerized tomography angiography; quantification of the structure and composition of the vessel wall and assessment for lipid-rich necrotic core plaque to assess atherosclerotic plaque stability
Radiology	0713T*	Noninvasive arterial plaque analysis using software processing of data from non-coronary computerized tomography angiography; data review, interpretation and report

*** Will be considered as EIU – Experimental, Investigational, or Unproven**

+ Add-on / primary codes are as follows:

- Use add-on code 0698T in conjunction with primary CPT code(s) 70540, 70542, 70543, 70551, 70552, 70553, 71550, 71551, 71552, 72141, 72142, 72146, 72147, 72148, 72149, 72156, 72157, 72158, 72195, 72196, 72197, 73218, 73219, 73220, 73221, 73222, 73223, 73718, 73719, 73720, 73721, 73722, 73723, 74181, 74182, 74183, 75557, 75559, 75561, 75563, 76390, 76498, 77046, 77047, 77048, 77049, 0398T, when evaluation same organ, glad tissue, or target structure.
- Use add-on code 93319 in conjunction with primary procedure CPT code(s) 93303, 93304, 93312, 93314, 93315, or 93317

The AMA will be deleting the following codes effective 12/31/2021. if eviCore receives these codes for DOS after 12/31/2021, claims will deny for Procedure Code invalid for DOS:

Solution	Code	Description
Radiology	72275*	Epidurography, radiological supervision and interpretation
Radiology	76101	Radiologic examination, complex motion (ie, hypercycloidal) body section (eg, mastoid polytomography), other than with urography; unilateral
Radiology	76102	Radiologic examination, complex motion (ie, hypercycloidal) body section (eg, mastoid polytomography), other than with urography; bilateral

***Effective 1/1/22, the deleted codes listed below will be redirected to the identified new AMA codes:**

- 72275 after 1/1/22 will be redirected to existing CPT code(s) 62281, 62282, 62321, 62323, 62325, 62327, 64479, 64480, 64483, or 64484 **in the Interventional Pain Management (IPM) program**
- 93530 after 1/1/22 will be redirected to new CPT code(s) 93593 or 93594 (also listed as a new code above)
- 93531 after 1/1/22 will be redirected to new CPT code(s) 93596 or 93597 (also listed as a new code above) or existing CPT 93462
- 93532 after 1/1/22 will be redirected to new CPT code(s) 93596 or 93597 (also listed as a new code above) or existing CPT 93462
- 93533 after 1/1/22 will be redirected to new CPT code(s) 93596 or 93597 (also listed as a new code above) or existing CPT 93462

The AMA has revised the following code descriptions effective 01/01/2022:

Solution	Code	Description
Radiology	0648T	Quantitative magnetic resonance for analysis of tissue composition (eg, fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation and report, obtained without diagnostic MRI examination of the same anatomy (eg, organ, gland, tissue, target structure) during the same session; single organ
Radiology	+0649T	Quantitative magnetic resonance for analysis of tissue composition (eg, fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation and report, obtained with diagnostic MRI examination of the same anatomy (eg, organ, gland, tissue, target structure); single organ (List separately in addition to code for primary procedure)
Radiology	75573	Computed tomography, heart, with contrast material, for evaluation of cardiac structure and morphology in the setting of congenital heart disease (including 3D image postprocessing, assessment of left ventricular [LV] cardiac function, right ventricular [RV] structure and function and evaluation of venous vascular structures, if performed)

Disclosure: This notification is only for partial changes for mid-year additions, 12/31/2021 deletions, 2022 Description changes, and a few 01/01/2022 additions by the AMA. eviCore will be providing additional documentation in the near future for new codes that were/will be added by the AMA & AAPC.
